EDUCATION

Ghent University

Bachelor of Applied Computer Science, Specialization in AI and Data Engineering

Ghent, Belgium

Sep 2023 – Present

IVG School

High School Education (ASO) in Science and Mathematics

Ghent, Belgium

Sep 2017 – Jun 2023

EXPERIENCE

Full-stack Developer

Ghent University, Student Job

Ghent, Belgium

Mar 2025 – Present

- Developed and maintained a Django/Nuxt.js web application for document management.
- Wrote thorough documentation to ensure smooth project handover.

Data Automation Engineer

Optios, Student Job

Lochristi, Belgium

Mar 2025 – Present

- Developed automated workflows for data extraction, reducing manual effort by 20%.
- Integrated third-party APIs for data enrichment, which improved data accuracy.

Software Developer

Fintrax, Student Job

Ghent, Belgium

Feb 2024 – Mar 2025

- Developed features for a Django/Angular web application.
- Implemented PDF parsing solutions for efficient text extraction.
- Worked with APIs such as Exact Online, Silverfin, MyMinfin.

Software Engineer

EB Accountancy, Student Job

Ghent, Belgium

Aug 2023 – Apr 2024

- Implemented AI-powered OCR and classification for invoice processing
- Deployed on Google Cloud with a focus on scale and minimizing operational costs.
- Developed a MLOps pipeline, creating a positive feedback loop that continuously improves system performance with every invoice processed.

PROJECTS

Driving Exam Monitoring System | *Python, FastAPI, Google Cloud, MongoDB, Docker, Stripe*

- A real-time notification service that tracks available driving exam slots across platforms. Built with Python, FastAPI, Google Cloud, and MongoDB, it monitors data changes and sends instant notifications via email, Discord, and Telegram.

CERTIFICATIONS

Harvard CS50 Python Certification

LANGUAGES

Dutch (Native), Arabic (Native), French (Advanced), English (Advanced)
